

# Catalyzer Corner

The Catalyzer Corner offers attendees a unique platform for engaging in interactive discussions and collaborating with experts in the healthtech field. Through micro talks followed by interactive discussions, participants gain access to diverse perspectives and leave with new insights and actionable items. These sessions, lasting 30 minutes each, complement the main program, allowing for deep dives into topics and fostering dynamic engagement between presenters and attendees. It serves as a forum for thought-provoking discussions, networking, and meaningful connections, enriching the overall conference experience with diverse viewpoints and insights.

The Catalyzer Corner hosts engaging sessions consisting of two TED-style micro talks, each followed by a moderated discussion with the audience. Each session spans a total of 30 minutes.

These sessions complement the main program, with some talks aligning with its content, while others serve as precursors. Catalyzers will get the chance to lead the conversation around the main topics and highlight their expertise.

The audience will have the opportunity to voice their opinions in a small and more intimate deep-dive conversation, network with like-minded peers, and have spirited debates with diverse participants. The BOOM Catalyzer Corner offers the opportunity to foster a dynamic engagement between presenters and attendees. It's a safe space for thought-provoking discussions and meaningful connections where differing viewpoints are encouraged. It provides enrichment of the main program where diverse voices converge to share insightful views.
